

JIHED DRIDI

Engineering Student, 5th Year - Cloud Computing & DevOps | Seeking Final-Year Internship (PFE) in Cloud & DevOps
Tunis, Tunisia | +216 50 489 263 | jihed.dridi@esprit.tn | <https://www.linkedin.com/in/jihed-dridi> | <https://github.com/Jiheddridi>

PROFESSIONAL SUMMARY

Final-year engineering student at ESPRIT, Tunis, specializing in Cloud Computing and DevOps, seeking a final-year internship (PFE) in Cloud & DevOps. Hands-on experience with Kubernetes, GitOps / Argo CD, Azure, OpenStack, Terraform, Docker, and Continuous Integration / Continuous Deployment (CI/CD) automation using GitLab CI/CD, Jenkins, and Ansible. Designed reproducible infrastructures, containerized environments, and deployment pipelines; cut manual audit workload by over 70% in a production environment at KPMG. Microsoft Certified: Azure Administrator Associate (AZ-104).

SKILLS

Cloud & Infrastructure as Code (IaC): Azure (Azure Kubernetes Service - AKS, Azure Container Registry - ACR, Web App, VNets, NSG, Key Vault, Azure Monitor), OpenStack (Keystone, Nova, Neutron, Cinder), Terraform

DevOps & CI/CD: GitLab CI/CD, Argo CD (GitOps), Jenkins, Ansible, Docker, Trivy

Cloud Native & Kubernetes: Kubernetes (Horizontal Pod Autoscaler - HPA, Secrets, PVC, multi-node clusters), Helm, Docker, containers, microservices

Monitoring / Observability: Prometheus, Grafana, Azure Monitor

Systems, Networking & Security: Linux, Bash, networking, VLAN, troubleshooting, Git, GitHub, Nessus, Trivy

DevOps Practices: GitOps, Infrastructure as Code (IaC), continuous deployment, automation, observability, technical reporting

Transferable Skills: teamwork, technical project management, analytical thinking, technical communication, autonomy

PROFESSIONAL EXPERIENCE

Cloud & DevOps Engineering Intern | Sofrecom Tunisia (Orange) Jul 2026 - Aug 2026

- Took ownership of the design and deployment, end to end, of the Kubernetes infrastructure for the DevInsight microservices platform: multi-stage Dockerfiles, generic Helm charts, 4-node kind cluster (control-plane + 3 workers)
- Implemented continuous GitOps deployment with Argo CD in coordination with the development team, validated end to end across 3 microservices (user-service, workspace-service, project-service)
- Automated build, test, and deployment workflows via a GitLab CI/CD pipeline, and integrated the GitLab and Jira Application Programming Interfaces (APIs) (2 data sources) to centralize project activity and automate reporting

Cloud and Automation Intern | KPMG Tech Solutions Jun 2025 - Aug 2025

- Built and managed a web platform for navigating an IT governance framework (5 domains, 40 objectives) on Azure Web App, using a Blue-Green deployment strategy (staging slot with slot swap) that ensured zero-downtime production releases
- Developed an n8n automation agent that processes audit documents via an LLM API and generates structured reports by email, cutting audit turnaround time by more than 70%

Network Administration Intern | IT Center, Ministry of Finance Jun 2023 - Aug 2023

- Configured 6 Cisco Catalyst switches with VLAN segmentation across 8 departmental networks, improving traffic isolation
- Conducted vulnerability audits on 3 production servers using Nessus, identified more than 12 critical vulnerabilities, and produced remediation reports

ACADEMIC PROJECTS

CloudJobHunt - Cloud-Native Job Aggregator on Azure | Academic project Jan 2026 - Feb 2026

- Provisioned a 3-node AKS (Azure Kubernetes Service) cluster with Horizontal Pod Autoscaler (HPA) via Terraform (VNets, NSG, ACR, AKS), fully reproducible infrastructure with a single terraform apply command
- Containerized a FastAPI + Redis backend and an Nginx frontend into 3 Docker images in Azure Container Registry (ACR) (build time under 4 minutes)
- Built a 2-stage Jenkins pipeline (build and deploy), reducing manual steps from 8 to 2, automatically triggered on every Git commit

Food-Recycle - Food Donation Platform on OpenStack | Academic project Sep 2025 - Jan 2026

- Set up a private OpenStack cloud (Keystone, Nova, Neutron, Cinder) end to end on 3 bare-metal nodes
- Orchestrated 6 Docker containers on a 2-worker-node Kubernetes cluster with persistent volumes and health checks
- Automated full provisioning with 3 Ansible playbooks, reducing setup time to under 15 minutes (more than 90% reduction)

EDUCATION

Engineering Degree - Cloud Computing & DevOps | ESPRIT - Private Higher School of Engineering and Technology, Tunis, Tunisia 2022 - 2027

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate (AZ-104) - Microsoft - Obtained April 21, 2026 (preparation: IT LAND, Azure portal, networking, security)
- CCNA: Switching, Routing and Wireless Essentials - Cisco Networking Academy - Jul 2025

EXTRACURRICULAR ACTIVITIES

- Member, ESSAI Machine Learning Club | Workshops on Artificial Intelligence and Machine Learning - Sep 2024 - Sep 2025

LANGUAGES

French (Professional - B2) | English (Professional - B2) | Arabic (Native)
